AMENDMENTS TO THE ABSTRACT

Kindly replace the Abstract on Page 13 with the new Abstract which reads as follows:

A metal wire rod shopping cart wherein a reinforced display frame is integrated in a wall of at least one of a front wall, opposed side walls or the backrest wall of a baby seat compartment. ~~The reinforced display frame is a U-shaped metal channel defined by opposed parallel side channel members and an integral transverse end channel member disposed in a common plane. The channel members have longitudinal slots having a slot opening facing inwardly to one another.~~ A metal panel sheet is secured substantially centrally in ~~said slots of at least said opposed parallel side channel members~~ a U-shaped metal channel to divide the slots to form an outer and inner slot adjacent an ~~outer and inner side wall of the metal panel sheet~~ channel into opposed slots whereby to receive a promotional sheet having display material thereon ~~in sliding fit over the outer and inner side walls between opposed parallel ones of the outer and inner slots.~~ The reinforced display frame is welded to metal wire rods in the ~~said wall about the channel members whereby the reinforced display frame~~ and lies in the plane of the side wall to provide for non-obstruction when nesting said shopping cart with other like shopping carts and to reinforce the side wall ~~while providing a backing surface behind the promotional sheet or sheets.~~
